
CPU calculations and controlled policy execution; not GPU serving measurements
(a) Bound arithmetic
code
mooncake
sharegpt
longgen
Reserve reduction (%)
Nominal sample size N
Bands: setting range
Points: 20 seeds; bars: sample SD
(b) Executed policies
Dotted: $\alpha T/2$
Cumulative mismatch loss
Routing requests T
(c) Label-noise control
Mean loss / α
Type-label flip probability
Restricted / no residual
Typed / sufficient flat
